ORGANIC COTTON YARN (B100)

ORGANIC COTTON (B100): The natural organic feeling! The B100 organic cotton yarn is produced according to the industry standards of 100% organic cotton.

WHAT IS ORGANIC COTTON
Organic cotton is produced according to organic agriculture methods. It is produced by farms where no synthetic chemical pesticides, herbicides and fertilizers have been used for at least three years. Instead of using agricultural pesticides, beneficial organisms such as parasites and natural enemies are used for insect management.

ORGANIC COTTON MAIN CHARACTERISTICS
Due to controlled organic production, our B100 organic cotton yarn presents exceptional evenness as well as very good pilling performance, while maintaining high tenacity. It is clean from foreign fibers and features evenness in dyeing.

WHAT DOES THIS MEAN FOR ME?
The fabric of B100 organic cotton is naturally pure and soft. The controlled production and absence of chemicals result in an extremely skin friendly product. A product that respects the environment and increases the ecological awareness.

WHERE CAN I USE THE ORGANIC COTTON?
Organic cotton can be used in a great variety of applications, like apparel, lingerie and loungewear. Many well-known brands use organic cotton and its’ unique properties, especially for children and baby clothing.

OUR RUNNINGS
Counts from Ne 24/1 to Ne 60/1
We offer upon request yarns on dye tubes, s-twist, multi-ply, compact, core-spun, crepe, multicount and slub yarns, ready to meet each and every need.

Organic standards GOTS
The aim of the Global Organic Textile Standard (GOTS) is to define requirements to ensure organic status of textiles, from harvesting of the raw materials, through environmentally and socially responsible manufacturing up to labelling, in order to provide a credible assurance to the end consumer.

Our B100 organic cotton labeling
Every product produced with the use of B100 yarn is entitled to the advantages of the B100 label, which certifies its high organic quality.
